

Appendix A Test Plan for TCI/TCI-CL Series01 (with host simulator)

1. Test Cases

1.1. Contact

1.1.1. 211_01

Test Objective

[CT][Purchase]

1) To verify the data listed below is consistent at the following stages: (a) input to Terminal, (b) output to Card, and (c) output to Network.

- Amount, Other (Numeric)=0
- Transaction Type="00"

2) To verify the data listed below is consistent at the following stages: (a) ICS, (b) output to Card, and (c) output to Network.

- Terminal Country Code
- Terminal Type
- Transaction Currency Code

3) To verify the data listed below is consistent at the following stages: (a) output to Card, and (b) output to Network.

- Terminal Verification Results
- Transaction Date
- Amount, Authorised (Numeric)

4) To verify the data listed below is identical to Card response to Terminal.

- Application PAN Sequence Number (Tag:'5F34')
- Application Transaction Counter (Tag:'9F36')
- Cryptogram Information Data (Tag:'9F27')
- Issuer Application Data (IAD) (Tag:'9F10')
- Application Interchange Profile (Tag:'82')
- Application PAN (Tag:'5A')

5) To verify following data are correctly printed to Receipt.

- Cardnumber(masked partially)
- Merchant's name
- Transaction Amount in the Transaction Currency
- Currency symbol or words denoting the Transaction Currency
- Authorization Approval Code
- Transaction Date
- AID or other code that identifies the application.
- Cardmember signature(optional)

6) To verify Transaction Amount displayed is same as Amount input.

7) To verify Application Cryptogram (AC) (Tag:'9F26') is correct.

Test Card

Card_CT_01

Test Procedure

Transaction Type	Purchase
Transaction Amount (Amount, Authorised (Numeric))	If Online only or Offline with online capability terminal: - Equal to or greater than Terminal Floor Limit If Offline only terminal: - Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	Transaction Amount must be displayed
Receipt (if NOT Transit Reader)	i) Printed Transaction Amount must be equal to the input amount. ii) The data listed below must be printed. - Cardnumber - Merchant's name - Transaction Amount in the Transaction Currency - Currency symbol or words denoting the Transaction Currency - Authorization Approval Code - Transaction Date - AID or other code that identifies the application.
Transaction Result (Behaviour)	Transaction must be approved
Card/Terminal Log Validation	
i) The data listed below must be 0. - Amount, Other (Numeric)	
ii) The data listed below must be consistent with its value in ICS. - Terminal Country Code - Terminal Type - Transaction Currency Code	
iii) The data listed below must be "00 (Purchase)". - Transaction Type	

Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)
i) The data listed below must be consistent with its value received at Card Simulator. - Terminal Verification Results (Tag 95) - Transaction Date (Tag 9A) - Amount, Authorised (Numeric) (Tag 9F02) - Terminal Country Code (Tag 9F1A) - Terminal Type (Tag 9F35) - Transaction Currency Code (Tag 5F2A)
ii) The data listed below must be 0. - Amount, Other (Numeric) (Tag 9F03) - Application PAN Sequence Number (Tag 5F34) [Bit 23]
iii) The data listed below must be "00 (Purchase)". - Transaction Type (Tag 9C)
iv) The data listed below must be consistent with its value in Card Simulator log. - Application Transaction Counter (Tag 9F36) - Cryptogram Information Data (Tag:'9F27') - Issuer Application Data (IAD) (Tag:'9F10') - Application Interchange Profile (Tag:'82') - Application PAN (Tag:'5A') [Bit 2]
v) The validation of Application Cryptogram (AC) (Tag:'9F26') is successful.

1.1.2. 211_05

Test Objective

[CT][Refund]

1) To verify the data listed below is consistent at the following stages: (a) input to Terminal, (b) output to Card, and (c) output to Network.

- Amount, Other (Numeric)=0
- Transaction Type="20"

2) To verify the data listed below is consistent at the following stages: (a) output to Card, and (b) output to Network.

- Amount, Authorised (Numeric)

Test Card

Card_CT_01

Test Procedure

Transaction Type	Refund
------------------	--------

Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be approved
Card/Terminal Log Validation	
i) The data listed below must be 0. - Amount, Other (Numeric)	
ii) The data listed below must be "20 (Refund)". - Transaction Type	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.1.3. 211_07

Test Objective

[CT][Cash Advance]

- To verify the data listed below is consistent at the following stages: (a) input to Terminal, (b) output to Card, and (c) output to Network.
 - Amount, Other (Numeric)=0
 - Transaction Type="01"
- To verify the data listed below is consistent at the following stages: (a) ICS, (b) output to Card, and (c) output to Network.
 - Terminal Country Code
 - Terminal Type
 - Transaction Currency Code
- To verify the data listed below is consistent at the following stages: (a) output to Card, and (b) output to Network.
 - Terminal Verification Results
 - Transaction Date
 - Amount, Authorised (Numeric)
- To verify the data listed below is identical to Card response to Terminal.
 - Application PAN Sequence Number (Tag:'5F34')

- Application Transaction Counter (Tag:'9F36')
 - Cryptogram Information Data (Tag:'9F27')
 - Issuer Application Data (IAD) (Tag:'9F10')
 - Application Interchange Profile (Tag:'82')
 - Application PAN (Tag:'5A')
- 5) To verify following data are correctly printed to Receipt.
- Cardnumber(masked partially)
 - Merchant's name
 - Transaction Amount in the Transaction Currency
 - Currency symbol or words denoting the Transaction Currency
 - Authorization Approval Code
 - Transaction Date
 - AID or other code that identifies the application.
 - Cardmember signature(optional)
- 6) To verify Transaction Amount displayed is same as Amount input.
- 7) To verify Cash Advance transaction requests an Authorisation Approval Code
- 8) To verify Application Cryptogram (AC) (Tag:'9F26') is correct.

Test Card

Card_CT_01

Test Procedure

Transaction Type	Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	Transaction Amount (= input value) must be displayed.

Receipt (if NOT Transit Reader)	i) Printed Transaction Amount must be equal to the input amount. ii) The data listed below must be printed. - Cardnumber - Merchant's name - Transaction Amount in the Transaction Currency - Currency symbol or words denoting the Transaction Currency - Authorization Approval Code - Transaction Date - AID or other code that identifies the application.
Transaction Result (Behaviour)	Transaction must be approved online
Card/Terminal Log Validation	
i) The data listed below must be 0. - Amount, Other (Numeric)	
ii) The data listed below must be consistent with its value in ICS. - Terminal Country Code - Terminal Type - Transaction Currency Code	
iii) The data listed below must be "01 (Cash Advance)". - Transaction Type	
iv) The data listed below must be "Minimum Transaction Amount". - Amount, Authorised (Numeric) (Tag 9F02)	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
i) The data listed below must be consistent with its value received at Card Simulator. - Terminal Verification Results (Tag 95) - Transaction Date (Tag 9A) - Amount, Authorised (Numeric) (Tag 9F02) - Terminal Country Code (Tag 9F1A) - Terminal Type (Tag 9F35) - Transaction Currency Code (Tag 5F2A)	
ii) The data listed below must be 0. - Amount, Other (Numeric) (Tag 9F03) - Application PAN Sequence Number (Tag:'5F34') [Bit 23]	
iii) The data listed below must be "01 (Cash Advance)". - Transaction Type (Tag 9C)	

iv) The data listed below must be consistent with its value in Card Simulator log.

- Application Transaction Counter (Tag:'9F36')
- Cryptogram Information Data (Tag:'9F27')
- Issuer Application Data (IAD) (Tag:'9F10')
- Application Interchange Profile (Tag:'82')
- Application PAN (Tag:'5A') [Bit 2]

v) The validation of Application Cryptogram (AC) (Tag:'9F26') is successful.

1.1.4. 211_09

Test Objective

[CT][Balance Inquiry]

To verify the data listed below is consistent at the following stages: (a) input to Terminal, (b) output to Card, and (c) output to Network.

- Transaction Type="30"

Test Card

Card_CT_01

Test Procedure

Transaction Type	Balance Inquiry
Transaction Amount (Amount, Authorised (Numeric))	N/A
Other Amount (Amount, Other (Numeric))	N/A
Host Simulator (if Online only or Offline with online capability terminal)	- Return ARC=00 - Return Balance Amount = 100
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	Balance ("100") must be printed.
Transaction Result (Behaviour)	Transaction must be approved online
Card/Terminal Log Validation	
i) The data listed below must be 0. - Amount, Authorised (Numeric) - Amount, Other (Numeric)	
ii) The data listed below must be "30 (Balance Inquiry)". - Transaction Type	

Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)
i) The data listed below must be 0. - Amount, Authorised (Numeric) (Tag 9F02) - Amount, Other (Numeric) (Tag 9F03)
ii) The data listed below must be "30 (Balance Inquiry)". - Transaction Type (Tag 9C)

1.1.5. 213_01

Test Objective

[CT][Non-standard DOL]

- To verify the data listed below is consistent at the following stages: (a) ICS, (b) output to Card, and (c) output to Network.
 - Merchant Category Code (Tag:'9F15')
 - Terminal Capabilities (Tag:'9F33')
 - Application Version Number (Tag:'9F09')
 - Interface Device Serial Number (Tag:'9F1E')
- To verify the data listed below is consistent at the following stages: (a) output to Card, and (b) output to Network.
 - Cardholder Verification Method (CVM) Results (Tag:'9F34')
 - Transaction Sequence Counter (Tag:'9F41')

Test Card

Card_CT_19

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Terminal Floor Limit
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A

Card/Terminal Log Validation
i) If it is possible to retrieve the data listed below, the values must be consistent with the values in ICS. If it is NOT possible to retrieve the data, you will pass this criterion regardless. - Merchant Category Code (Tag:'9F15') - Terminal Capabilities (Tag:'9F33') B1b7 (Magnetic stripe) - Terminal Capabilities (Tag:'9F33') B1b6 (IC with contacts) - Terminal Capabilities (Tag:'9F33') B2b8 (Plaintext PIN for ICC verification) - Terminal Capabilities (Tag:'9F33') B2b7 (Enciphered PIN for online verification) - Terminal Capabilities (Tag:'9F33') B2b6 (Signature (paper)) - Terminal Capabilities (Tag:'9F33') B2b5 (Enciphered PIN for offline verification) - Terminal Capabilities (Tag:'9F33') B2b4 (No CVM Required) - Terminal Capabilities (Tag:'9F33') B3b8 (SDA) - Terminal Capabilities (Tag:'9F33') B3b7 (DDA) - Terminal Capabilities (Tag:'9F33') B3b4 (CDA) - Application Version Number (Tag:'9F09') - Interface Device Serial Number (Tag:'9F1E')
ii) If it is possible to retrieve the data listed below, the Terminal Capabilities (Tag:'9F33') shows that the value of the following Byte Bit must be; - B1b5-1 = 00000 - B2b3-1 = 000 - B3b5 = 0 - B3b3-1 = 000
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)
i) The data listed below must be consistent with its value in Card Log or zero padding. - Merchant Category Code (Tag:'9F15') [Bit 18] - Terminal Capabilities (Tag:'9F33') - Application Version Number (Tag:'9F09') - Cardholder Verification Method (CVM) Results (Tag:'9F34') - Interface Device Serial Number (Tag:'9F1E')* - Transaction Sequence Counter (Tag:'9F41')*
ii) The Terminal Capabilities (Tag:'9F33') shows that the value of the following Byte Bit must be; - B1b5-1 = 00000 - B2b3-1 = 000 - B3b5 = 0 - B3b3-1 = 000 *This parameter will be tested only If ICS indicates the parameter is set on the Network.

1.1.6. 213_03

Test Objective

[CT][POS Entry Mode]

To verify the data listed below is consistent at the following stages: (a) output to Network, and (b) output to Card.

- Point-of-Service (POS) Entry Mode (Tag:'9F39')="05"

Test Card

Card_CT_18

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Terminal Floor Limit
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be approved
Card/Terminal Log Validation	
If it is possible to retrieve the data listed below, the values must be "05 (Contact IC Transaction)". If it is NOT possible to retrieve the data, you will pass this criterion regardless. - Point-of-Service (POS) Entry Mode (Tag:'9F39')	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
The data listed below must be "05 (Contact IC Transaction)". - Point-of-Service (POS) Entry Mode (Tag:'9F39') [Bit 22 byte1]	

1.1.7. 213_07

Test Objective

[CT][Non-standard DOL][Offline only]

To verify the data listed below is consistent with ICS.

- Merchant Category Code (Tag:'9F15')
- Terminal Capabilities (Tag:'9F33')
- Application Version Number (Tag:'9F09')
- Interface Device Serial Number (Tag:'9F1E')

Test Card

Card_CT_20

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if <i>NOT</i> Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
i) If it is possible to retrieve the data listed below, the values must be consistent with the values in ICS. If it is NOT possible to retrieve the data, you will pass this criterion regardless. - Merchant Category Code (Tag:'9F15') - Terminal Capabilities (Tag:'9F33') B1b7 (Magnetic stripe) - Terminal Capabilities (Tag:'9F33') B1b6 (IC with contacts) - Terminal Capabilities (Tag:'9F33') B2b8 (Plaintext PIN for ICC verification) - Terminal Capabilities (Tag:'9F33') B2b7 (Enciphered PIN for online verification) - Terminal Capabilities (Tag:'9F33') B2b6 (Signature (paper)) - Terminal Capabilities (Tag:'9F33') B2b5 (Enciphered PIN for offline verification) - Terminal Capabilities (Tag:'9F33') B2b4 (No CVM Required) - Terminal Capabilities (Tag:'9F33') B3b8 (SDA) - Terminal Capabilities (Tag:'9F33') B3b7 (DDA) - Terminal Capabilities (Tag:'9F33') B3b4 (CDA) - Application Version Number (Tag:'9F09') - Interface Device Serial Number (Tag:'9F1E')	

ii) If it is possible to retrieve the data listed below, the Terminal Capabilities (Tag:'9F33') shows that the value of the following Byte Bit must be;

- B1b5-1 = 00000
- B2b3-1 = 000
- B3b5 = 0
- B3b3-1 = 000

Host Log Validation

(if **Online only** or **Offline with online capability** terminal)

(if **NOT** Transit Reader)

N/A

1.1.8. 214_01

Test Objective

To verify the data listed below is consistent with ICS.

- Application Identifier (AID) (Tag:'9F06')
- Terminal Floor Limit (Tag:'9F1B')
- Transaction Currency Exponent (Tag:'5F36')

Test Card

Card_CT_21

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	

If it is possible to retrieve the data listed below, the values must be consistent with the values in ICS. If it is NOT possible to retrieve the data, you will pass this criterion regardless.

- Application Identifier (AID) (Tag:'9F06')
- Terminal Floor Limit (Tag:'9F1B')
- Transaction Currency Exponent (Tag:'5F36')

Host Log Validation

(if **Online only** or **Offline with online capability** terminal)

(if **NOT** Transit Reader)

N/A

1.1.9. 310_01

Test Objective

[CT]

Transaction approved offline.

Test Card

Card_CT_28

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction approved offline
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	

N/A

1.1.10. 320_01a

Test Objective

[CT][CVM][Offline Enciphered PIN][CAPK Index=13]

- 1) To verify the Cardholder Verification Method (CVM) below is consistent with ICS.
 - Offline Enciphered PIN
- 2) To verify Certification Authority Public Key (CAPK) is correctly stored in terminal if Terminal supports the CVM below.
 - Offline Enciphered PIN

Test Card

Card_CT_04

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	If Online only or Offline with online capability terminal: - Equal to or greater than Terminal Floor Limit If Offline only terminal: - Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN = "1234"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS: i) Cardholder Verification Entry Device must be used to enter PIN ii) PIN verification must succeed If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS: - PIN verification must NOT be performed. If Terminal Type is '14'(ATM) according to ICS: - Transaction must be declined or terminated.

Card/Terminal Log Validation
If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; - B3b8 = 0 - B3b7 = 0 - B3b6 = 0 - B3b5 = 0 - B3b4 = 0 - B3b3 = 0 If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; - B3b8 = 1
Host Log Validation
(if Online only or Offline with online capability terminal) (if NOT Transit Reader)
If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS: - The Cardholder Verification Method (CVM) Results must be "04 00 02". - B1 = "04" (Offline Enciphered PIN) - B3 = "02" (successful) If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS: - The Cardholder Verification Method (CVM) Results shows that the value of the following Byte must be; - B1 = "3F" (No CVM performed)

1.1.11. 320_01b ※CA Public Key Index 11 is sunset at December 31, 2024. After January 2025, 320_01b does not need to be tested.

Test Objective

[CT][CVM][Offline Enciphered PIN][CAPK Index=11]

- 1) To verify the Cardholder Verification Method (CVM) below is consistent with ICS.
 - Offline Enciphered PIN
- 2) To verify Certification Authority Public Key (CAPK) is correctly stored in terminal if Terminal supports the CVM below.
 - Offline Enciphered PIN

Test Card

Card_CT_03

Test Procedure

Transaction Type	Purchase or Cash Advance
------------------	--------------------------

Transaction Amount (Amount, Authorised (Numeric))	If Online only or Offline with online capability terminal: - Equal to or greater than Terminal Floor Limit If Offline only terminal: - Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN = "1234"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS: i) Cardholder Verification Entry Device must be used to enter PIN ii) PIN verification must succeed If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS: - PIN verification must NOT be performed. If Terminal Type is '14'(ATM) according to ICS: - Transaction must be declined or terminated.
Card/Terminal Log Validation	
If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B3b8 = 0 B3b7 = 0 B3b6 = 0 B3b5 = 0 B3b4 = 0 B3b3 = 0 If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B3b8 = 1	
Host Log Validation	
(if Online only or Offline with online capability terminal) (if NOT Transit Reader)	

If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS:

- The Cardholder Verification Method (CVM) Results must be "04 00 02".

B1 = "04" (Offline Enciphered PIN)

B3 = "02" (successful)

If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS:

- The Cardholder Verification Method (CVM) Results shows that the value of the following Byte must be;

B1 = "3F" (No CVM performed)

1.1.12. 320_02

Test Objective

[CT][CVM][Offline Plaintext PIN]

To verify the Cardholder Verification Method (CVM) below is consistent with ICS.

- Offline Plaintext PIN

Test Card

Card_CT_05

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	If Online only or Offline with online capability terminal: - Equal to or greater than Terminal Floor Limit If Offline only terminal: - Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN = "1234"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A

Transaction Result (Behaviour)	If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS: i) Cardholder Verification Entry Device must be used to enter PIN ii) PIN verification must succeed If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS: - PIN verification must NOT be performed. If Terminal Type is '14'(ATM) according to ICS: - Transaction must be declined or terminated.
Card/Terminal Log Validation	
If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; - B3b8 = 0 - B3b7 = 0 - B3b6 = 0 - B3b5 = 0 - B3b4 = 0 - B3b3 = 0 If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; - B3b8 = 1	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS: - The Cardholder Verification Method (CVM) Results must be "01 00 02". - B1 = "01" (Offline Plaintext PIN) - B3 = "02" (successful) If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS: - The Cardholder Verification Method (CVM) Results shows that the value of the following Byte must be; - B1 = "3F" (No CVM performed)	

1.1.13. 320_03

Test Objective

[CT][CVM][Online PIN]

To verify the Cardholder Verification Method (CVM) below is consistent with ICS.

- Online PIN

Test Card

Card_CT_02a

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN = "1234"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	If the CVM is supported according to ICS: i) Cardholder Verification Entry Device must be used to enter PIN ii) PIN verification must be performed If the CVM is NOT supported according to ICS: - PIN verification must NOT be performed.
Card/Terminal Log Validation	
If the CVM is supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; - B3b8 = 0 - B3b7 = 0 - B3b6 = 0 - B3b5 = 0 - B3b4 = 0 - B3b3 = 1 If the CVM is NOT supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; - B3b8 = 1 - B3b3 = 0	
Host Log Validation	
(if Online only or Offline with online capability terminal) (if NOT Transit Reader)	

If the CVM is supported according to ICS:

- i) The Cardholder Verification Method (CVM) Results shows that the value of the following Byte must be;
B1 = "02"(Online PIN)
B2 = "00"
- ii) The PIN value must be consistent with its input value to Terminal (= "1234"). [Bit 52]

If the CVM is NOT supported according to ICS:

- The Cardholder Verification Method (CVM) Results shows that the value of the following Byte must be;
B1 = "3F" (No CVM performed)

1.1.14. 320_05

Test Objective

[CT][CVM][Signature]

To verify the Cardholder Verification Method (CVM) below is consistent with ICS.

- Signature

Test Card

Card_CT_08

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	If Online only or Offline with online capability terminal: - Equal to or greater than Terminal Floor Limit If Offline only terminal: - Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	N/A

Receipt (if NOT Transit Reader)	If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS: - Signature line must be printed unless an electric device displays it. If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS: - N/A
Transaction Result (Behaviour)	If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS: i) Signature must be required ii) Receipt or an electric device must be used to capture Signature If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS: - Signature must NOT be required If Terminal Type is '14'(ATM) according to ICS: - Transaction must be declined or terminated.
Card/Terminal Log Validation	
If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B3b8 = 0 B3b7 = 0 B3b6 = 0 B3b5 = 0 B3b4 = 0 B3b3 = 0 If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B3b8 = 1 B3b3 = 0	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS: - The Cardholder Verification Method (CVM) Results shows that the value of the following Byte must be; B1 = "1E" (Signature) B2 = "00" If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS: - The Cardholder Verification Method (CVM) Results shows that the value of the following Byte must be; B1 = "3F" (No CVM performed)	

1.1.15. 320_07

Test Objective

[CT][CVM][No CVM]

To verify the Cardholder Verification Method (CVM) below is consistent with ICS.

- No CVM

Test Card

Card_CT_09

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	If Online only or Offline with online capability terminal: - Equal to or greater than Terminal Floor Limit If Offline only terminal: - Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if <i>NOT</i> Transit Reader)	N/A
Transaction Result (Behaviour)	If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS: - Cardholder Verification must NOT be conducted If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS: - Cardholder Verification must NOT be conducted If Terminal Type is '14'(ATM) according to ICS: - Transaction must be declined or terminated.
Card/Terminal Log Validation	

If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS:

- The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be;

B3b8 = 0

B3b7 = 0

B3b6 = 0

B3b5 = 0

B3b4 = 0

B3b3 = 0

If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS:

- The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be;

B3b8 = 1

B3b3 = 0

Host Log Validation

(if **Online only** or **Offline with online capability** terminal)

(if **NOT** Transit Reader)

If Terminal Type is NOT '14'(Not ATM) and the CVM is supported according to ICS:

- The Cardholder Verification Method (CVM) Results must be "1F 00 02".

B1 = "1F" (No CVM Required)

B3 = "02" (successful)

If Terminal Type is NOT '14'(Not ATM) and the CVM is NOT supported according to ICS:

- The Cardholder Verification Method (CVM) Results shows that the value of the following Byte must be;

B1 = "3F" (No CVM performed)

1.1.16. 330_01a

Test Objective

[CT][ODA][SDA][CAPK Index=13]

- 1) To verify the Offline Data Authentication (ODA) below is consistent with ICS.

- Static Data Authentication (SDA)

- 2) To verify Certification Authority Public Key (CAPK) is correctly stored in terminal if Terminal supports ODA below.

- Static Data Authentication (SDA)

Test Card

Card_CT_01

Test Procedure

Card_CT_02h

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN="12345678901"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transactions must be approved online.

Card/Terminal Log Validation
N/A
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)
The PIN value in the transaction log must be consistent with its input value to Terminal. - "12345678901"

1.1.39. 300_23i

Test Objective

[CT][Online PIN][12 digit]

To verify terminal handles Online PIN.

Test Card

Card_CT_02i

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN="123456789012"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transactions must be approved online.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	

The PIN value in the transaction log must be consistent with its input value to Terminal.
- "123456789012"

1.1.40. 300_25a

Test Objective

[CT][Online PIN][3 digit]

To verify terminal does not accept 3 digit Online PIN

Test Card

Card_CT_02a

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	Enter PIN="123"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction result must be one of the followings; - Transactoin is declined; OR - Terminal does NOT accept 3 digits/13 digits PIN entry
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.1.41. 300_25b

Test Objective

[CT][Online PIN][13 digit]

To verify terminal does not accept 13 digit Online PIN

Test Card

Card_CT_02a

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	Enter PIN="1234567890123"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction result must be one of the followings; - Transactoin is declined; OR - Terminal does NOT accept 3 digits/13 digits PIN entry
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.1.42. 300_27a

Test Objective

[CT][Response Code management][ARC=00]

To verify terminal correctly manages ARC.

Test Card

Card_CT_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Terminal Floor Limit
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be approved.
Card/Terminal Log Validation	
Authorisation Response Code must be followings: - "00"	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.1.43. 300_27b

Test Objective

[CT][Response Code management][ARC=01]

To verify terminal correctly manages ARC.

Test Card

Card_CT_01b

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Terminal Floor Limit
Other Amount (Amount, Other (Numeric))	0

Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=01
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must NOT be approved and terminal states a message which guides operator to refer the transaction to Issuer.
Card/Terminal Log Validation	
Authorisation Response Code must be followings: - "01"	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.1.44. 300_27c

Test Objective

[CT][Response Code management][ARC=04]
To verify terminal correctly manages ARC.

Test Card

Card_CT_01c

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Terminal Floor Limit
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=04
Notes	N/A

Pass Criteria

User Validation

Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be declined and terminal states a message which guides operator to pick up the card.
Card/Terminal Log Validation	
Authorisation Response Code must be followings: - "04"	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.1.45. 300_27d

Test Objective

[CT][Response Code management][ARC=05]

To verify terminal correctly manages ARC.

Test Card

Card_CT_01d

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Terminal Floor Limit
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=05
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be declined.
Card/Terminal Log Validation	
Authorisation Response Code must be followings: - "05"	

Host Log Validation

(if **Online only** or **Offline with online capability** terminal)

(if **NOT** Transit Reader)

N/A

1.1.46. 300_27e
Test Objective

[CT][Response Code management][ARC=55]

To verify terminal correctly manages ARC.

Test Card

Card_CT_01e

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Terminal Floor Limit
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=55
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be declined.
Card/Terminal Log Validation	
Authorisation Response Code must be followings: - "55"	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.1.47. 300_27f

Test Objective

[CT][Response Code management][ARC=61]

To verify terminal correctly manages ARC.

Test Card

Card_CT_01f

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Terminal Floor Limit
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=61
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be declined.
Card/Terminal Log Validation	
Authorisation Response Code must be followings: - "61"	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.1.48. 300_27g

Test Objective

[CT][Response Code management][ARC=62]

To verify terminal correctly manages ARC.

Test Card

Card_CT_01g

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Terminal Floor Limit
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=62
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be declined.
Card/Terminal Log Validation	
Authorisation Response Code must be followings: - "62"	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.1.49. 300_29

Test Objective

[CT][Bypass PIN Entry]

To verify the setting below is identical to ICS.

- Bypass PIN Entry

Test Card

Card_CT_07

Test Procedure

Transaction Type	Purchase or Cash Advance
-------------------------	--------------------------

Transaction Amount (Amount, Authorised (Numeric))	If Online only or Offline with online capability terminal: - Equal to or greater than Terminal Floor Limit If Offline only terminal: - Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Bypass PIN entry

Pass Criteria

User Validation	
Display	N/A
Receipt (if <i>NOT</i> Transit Reader)	N/A
Transaction Result (Behaviour)	Signature must be requested as CVM.
Card/Terminal Log Validation	
The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B3b8 = 0 B3b7 = 0 B3b6 = 0 B3b5 = 0 B3b4 = 1 B3b3 = 0	
Host Log Validation (if Online only or Offline with online capability terminal) (if <i>NOT</i> Transit Reader)	
The Cardholder Verification Method (CVM) Results shows that the value of the following Byte Bit must be; B1 = "1E" (Signature)	

1.2. Contactless

1.2.1. 211_02

Test Objective

[CL][Purchase]

If Transit Reader, (3), (4), (5) and (6) are out of scope of test.

1) To verify the data listed below is consistent at the following stages: (a) input to Terminal, (b) output to Card, and (c) output to Network.

- Amount, Other (Numeric)=0
- Transaction Type="00"

2) To verify the data listed below is consistent at the following stages: (a) ICS, (b) output to Card, and (c) output to Network.

- Terminal Country Code
- Terminal Type
- Transaction Currency Code

3) To verify the data listed below is consistent at the following stages: (a) output to Card, and (b) output to Network.

- Amount, Authorised (Numeric)

4) To verify the data listed below is identical to Card response to Terminal.

- Application PAN Sequence Number (Tag:'5F34')
- Application Transaction Counter (Tag:'9F36')
- Cryptogram Information Data (Tag:'9F27')
- Issuer Application Data (IAD) (Tag:'9F10')
- Application Interchange Profile (Tag:'82')
- Application PAN (Tag:'5A')

5) To verify the data listed below is identical to Card response to Terminal if Terminal is compliant to JCB Contactless Specification Version 1.4 or later, or EMV C-5 Specification 2.8 or later.

- Device Information (Tag:'9F6E')
- Partner Discretionary Data (Tag:'9F7C')

6) To verify following data are correctly printed to Receipt.

- Cardnumber(masked partially)
- Merchant's name
- Transaction Amount in the Transaction Currency
- Currency symbol or words denoting the Transaction Currency
- Authorization Approval Code
- Transaction Date
- AID or other code that identifies the application.
- Cardmember signature(optional)

7) To verify Transaction Amount displayed is same as Amount input.

8) To verify Application Cryptogram (AC) (Tag:'9F26') is correct.

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase
Transaction Amount (Amount, Authorised (Numeric))	If Online only or Offline with online capability terminal: - Equal to or greater than Contactless Floor Limit, and lower than Contactless Transaction Limit (if present) If Offline only terminal: - Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	Transaction Amount must be displayed
Receipt (if NOT Transit Reader)	i) Printed Transaction Amount must be equal to the input amount. ii) The data listed below must be printed. - Cardnumber - Merchant's name - Transaction Amount in the Transaction Currency - Currency symbol or words denoting the Transaction Currency - Authorization Approval Code - Transaction Date - AID or other code that identifies the application.
Transaction Result (Behaviour)	Transaction must be approved
Card/Terminal Log Validation	
i) The data listed below must be 0. - Amount, Other (Numeric)	
ii) The data listed below must be consistent with its value in ICS. - Terminal Country Code - Terminal Type - Transaction Currency Code	
iii) The data listed below must be "00 (Purchase)". - Transaction Type	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	

i) The data listed below must be consistent with its value received at Card Simulator. - Amount, Authorised (Numeric) (Tag 9F02) - Terminal Country Code (Tag 9F1A) - Terminal Type (Tag 9F35) - Transaction Currency Code (Tag 5F2A)
ii) The data listed below must be 0. - Amount, Other (Numeric) (Tag 9F03) - Application PAN Sequence Number (Tag:'5F34') [Bit 23]
iii) The data listed below must be "00 (Purchase)". - Transaction Type (Tag 9C)
iv) The data listed below must be consistent with its value in Card Simulator log. - Application Transaction Counter (Tag:'9F36') - Cryptogram Information Data (Tag:'9F27') - Issuer Application Data (IAD) (Tag:'9F10') - Application Interchange Profile (Tag:'82') - Application PAN (Tag:'5A') [Bit 2] - Device Information (Tag:'9F6E')* - Partner Discretionary Data (Tag:'9F7C')*
*This parameter will be tested only if terminal specification version is 1.4(JCB) / 2.8(C-5) or later
v) The validation of Application Cryptogram (AC) (Tag:'9F26') is successful.

1.2.2. 211_08

Test Objective

[CL][Cash Advance]

- 1) To verify the data listed below is consistent at the following stages: (a) input to Terminal, (b) output to Card, and (c) output to Network.
- Amount, Other (Numeric)=0
- Transaction Type="01"
- 2) To verify the data listed below is consistent at the following stages: (a) ICS, (b) output to Card, and (c) output to Network.
- Terminal Country Code
- Terminal Type
- Transaction Currency Code
- 3) To verify the data listed below is consistent at the following stages: (a) output to Card, and (b) output to Network.
- Amount, Authorised (Numeric)
- 4) To verify the data listed below is identical to Card response to Terminal.
- Application PAN Sequence Number (Tag:'5F34')
- Application Transaction Counter (Tag:'9F36')
- Cryptogram Information Data (Tag:'9F27')

- Issuer Application Data (IAD) (Tag:'9F10')
 - Application Interchange Profile (Tag:'82')
 - Application PAN (Tag:'5A')
- 5) To verify the data listed below is identical to Card response to Terminal if Terminal is compliant to JCB Contactless Specification Version 1.4 or later, or EMV C-5 Specification 2.8 or later.
- Device Information (Tag:'9F6E')
 - Partner Discretionary Data (Tag:'9F7C')
- 6) To verify following data are correctly printed to Receipt.
- Cardnumber(masked partially)
 - Merchant's name
 - Transaction Amount in the Transaction Currency
 - Currency symbol or words denoting the Transaction Currency
 - Authorization Approval Code
 - Transaction Date
 - AID or other code that identifies the application.
 - Cardmember signature(optional)
- 7) To verify Transaction Amount displayed is same as Amount input.
- 8) To verify Cash Advance transaction requests an Authorisation Approval Code
- 9) To verify Application Cryptogram (AC) (Tag:'9F26') is correct.

Test Card

Card_CL_01

Test Procedure

Transaction Type	Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	Transaction Amount (= input value) must be displayed.

Receipt (if NOT Transit Reader)	i) Printed Transaction Amount must be equal to the input amount. ii) The data listed below must be printed. - Cardnumber - Merchant's name - Transaction Amount in the Transaction Currency - Currency symbol or words denoting the Transaction Currency - Authorization Approval Code - Transaction Date - AID or other code that identifies the application.
Transaction Result (Behaviour)	Transaction must be approved online
Card/Terminal Log Validation	
i) The data listed below must be 0. - Amount, Other (Numeric)	
ii) The data listed below must be consistent with its value in ICS. - Terminal Country Code - Terminal Type - Transaction Currency Code	
iii) The data listed below must be "01 (Cash Advance)". - Transaction Type	
iv) The data listed below must be "Minimum Transaction Amount". - Amount, Authorised (Numeric) (Tag 9F02)	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
i) The data listed below must be consistent with its value received at Card Simulator. - Amount, Authorised (Numeric) (Tag 9F02) - Terminal Country Code (Tag 9F1A) - Terminal Type (Tag 9F35) - Transaction Currency Code (Tag 5F2A)	
ii) The data listed below must be 0. - Amount, Other (Numeric) (Tag 9F03) - Application PAN Sequence Number (Tag:'5F34') [Bit 23]	
iii) The data listed below must be "01 (Cash Advance)". - Transaction Type (Tag 9C)	

iv) The data listed below must be consistent with its value in Card Simulator log.

- Application Transaction Counter (Tag:'9F36')
- Cryptogram Information Data (Tag:'9F27')
- Issuer Application Data (IAD) (Tag:'9F10')
- Application Interchange Profile (Tag:'82')
- Application PAN (Tag:'5A') [Bit 2]
- Device Information (Tag:'9F6E')*
- Partner Discretionary Data (Tag:'9F7C')*

*This parameter will be tested only if terminal specification version is 1.4(JCB) / 2.8(C-5) or later

v) The validation of Application Cryptogram (AC) (Tag:'9F26') is successful.

1.2.3. 211_10

Test Objective

[CL][Balance Inquiry]

To verify the data listed below is consistent at the following stages: (a) input to Terminal, (b) output to Card, and (c) output to Network.

- Transaction Type="30"

Test Card

Card_CL_01

Test Procedure

Transaction Type	Balance Inquiry
Transaction Amount (Amount, Authorised (Numeric))	N/A
Other Amount (Amount, Other (Numeric))	N/A
Host Simulator (if Online only or Offline with online capability terminal)	- Return ARC=00 - Return Balance Amount = 100
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	Balance ("100") must be printed.
Transaction Result (Behaviour)	Transaction must be approved online
Card/Terminal Log Validation	

i) The data listed below must be 0. - Amount, Authorised (Numeric) - Amount, Other (Numeric)
ii) The data listed below must be "30 (Balance Inquiry)". - Transaction Type
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)
i) The data listed below must be 0. - Amount, Authorised (Numeric) (Tag 9F02) - Amount, Other (Numeric) (Tag 9F03)
ii) The data listed below must be "30 (Balance Inquiry)". - Transaction Type (Tag 9C)

1.2.4. 212_01

Test Objective

[CL][Standard DOL]

To verify the data listed below is consistent with ICS.

- Terminal Compatibility Indicator (Tag:'9F52')
- Terminal Interchange Profile (static) (Tag:'9F53')

Test Card

Card_CL_20

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A

Transaction Result (Behaviour)	Transaction must be approved
Card/Terminal Log Validation	
i) The data listed below must be consistent with its value in ICS. - Terminal Compatibility Indicator B1b2 (EMV Mode Supported) - Terminal Compatibility Indicator B1b1 (Magstripe Mode Supported) - Terminal Interchange Profile B1b7 (Signature supported) - Terminal Interchange Profile B1b6 (Online PIN supported) - Terminal Interchange Profile B1b5 (On-Device CVM supported) - Terminal Interchange Profile B1b3 (Reader is a Transit Reader) - Terminal Interchange Profile B1b2 (EMV contact chip supported) - Terminal Interchange Profile B1b1 ((Contact Chip) Offline PIN supported) - Terminal Interchange Profile B2b8 (Issuer Update supported)	
ii) The Terminal Compatibility Indicator shows that the value of the following Byte Bit must be; - B1b8-3 = 000000	
iii) The Terminal Interchange Profile (TIP) shows that the value of the following Byte Bit must be; - B1b4 = 0 - B2b7-1 = 0000000 - B3b8-1 = 00000000	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.5. 213_02

Test Objective

[CL][Non-standard DOL]

If Transit Reader, (2) is out of scope of test.

- 1) To verify the data listed below is consistent at the following stages: (a) ICS, (b) output to Card, and (c) output to Network.
 - Merchant Category Code (Tag:'9F15')
 - Interface Device Serial Number (Tag:'9F1E')
- 2) To verify the data listed below is consistent at the following stages: (a) output to Card, and (b) output to Network.
 - Transaction Sequence Counter (Tag:'9F41')

Test Card

Card_CL_02

Test Procedure

Transaction Type	Purchase or Cash Advance
-------------------------	--------------------------

Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Contactless Floor Limit, and lower than Contactless Transaction Limit (if present)
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if <i>NOT</i> Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
If it is possible to retrieve the data listed below, the values must be consistent with the values in ICS. If it is NOT possible to retrieve the data, you will pass this criterion regardless. - Merchant Category Code (Tag:'9F15') - Interface Device Serial Number (Tag:'9F1E')	
Host Log Validation (if Online only or Offline with online capability terminal) (if <i>NOT</i> Transit Reader)	
The data listed below must be consistent with its value in Card Log or zero padding. - Merchant Category Code (Tag:'9F15') [Bit 18] - Interface Device Serial Number (Tag:'9F1E')* - Transaction Sequence Counter (Tag:'9F41')* *This parameter will be tested only If ICS indicates the parameter is set on the Network.	

1.2.6. 213_04

Test Objective

[CL][POS Entry Mode - EMV Mode]

To verify the data listed below is consistent at the following stages: (a) output to Network, and (b) output to Card.

- Point-of-Service (POS) Entry Mode (Tag:'9F39')="07"

Test Card

Card_CL_03

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Contactless Floor Limit, and lower than Contactless Transaction Limit (if present)
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	EMV mode

Pass Criteria

User Validation	
Display	N/A
Receipt (if <i>NOT</i> Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be approved
Card/Terminal Log Validation	
If it is possible to retrieve the data listed below, the values must be "07 (Contactless IC Transaction)". If it is NOT possible to retrieve the data, you will pass this criterion regardless. - Point-of-Service (POS) Entry Mode (Tag:'9F39')	
Host Log Validation (if Online only or Offline with online capability terminal) (if <i>NOT</i> Transit Reader)	
The data listed below must be "07 (Contactless IC Transaction)". - Point-of-Service (POS) Entry Mode (Tag:'9F39') [Bit 22 byte1]	

1.2.7. 213_05

Test Objective

[CL][POS Entry Mode - Legacy Mode]

To verify the data listed below is consistent at the following stages: (a) output to Network, and (b) output to Card.

- Point-of-Service (POS) Entry Mode (Tag:'9F39')="07"

Test Card

Card_CL_07

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount

Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Legacy mode

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be approved online
Card/Terminal Log Validation	
If it is possible to retrieve the data listed below, the values must be "07 (Contactless IC Transaction)". If it is NOT possible to retrieve the data, you will pass this criterion regardless. - Point-of-Service (POS) Entry Mode (Tag:'9F39')	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
The data listed below must be "07 (Contactless IC Transaction)". - Point-of-Service (POS) Entry Mode (Tag:'9F39') [Bit 22 byte1]	

1.2.8. 213_08

Test Objective

[CL][Non-standard DOL][Offline only]

To verify the data listed below is consistent with ICS.

- Merchant Category Code (Tag:'9F15')
- Interface Device Serial Number (Tag:'9F1E')

Test Card

Card_CL_15

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A

Notes	N/A
-------	-----

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
If it is possible to retrieve the data listed below, the values must be consistent with the values in ICS. If it is NOT possible to retrieve the data, you will pass this criterion regardless. - Merchant Category Code (Tag:'9F15') - Interface Device Serial Number (Tag:'9F1E')	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.9. 214_02

Test Objective

[CL][Non-standard DOL]

To verify the data listed below is consistent with ICS.

- Acquirer Identifier (Tag:'9F01')
- Application Identifier (AID) (Tag:'9F06')
- Transaction Currency Exponent (Tag:'5F36')
- Terminal Interchange Profile (static) (Tag:'9F53')

Test Card

Card_CL_17

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be approved
Card/Terminal Log Validation	
i) If it is possible to retrieve the data listed below, the values must be consistent with the values in ICS. If it is NOT possible to retrieve the data, you will pass this criterion regardless. - Acquirer Identifier (Tag:'9F01') - Application Identifier (AID) (Tag:'9F06') - Transaction Currency Exponent (Tag:'5F36') ii) The data listed below must be consistent with its value in ICS. - Terminal Interchange Profile B1b7 (Signature supported) - Terminal Interchange Profile B1b6 (Online PIN supported) - Terminal Interchange Profile B1b5 (On-Device CVM supported) - Terminal Interchange Profile B1b3 (Reader is a Transit Reader) - Terminal Interchange Profile B1b2 (EMV contact chip supported) - Terminal Interchange Profile B1b1 ((Contact Chip) Offline PIN supported) - Terminal Interchange Profile B2b8 (Issuer Update supported) iii) The Terminal Interchange Profile (TIP) shows that the value of the following Byte Bit must be; - B1b4 = 0 - B2b7-1 = 0000000 - B3b8-1 = 00000000	
Host Log Validation	
(if Online only or Offline with online capability terminal)	
(if NOT Transit Reader)	
N/A	

1.2.10. 222_04

Test Objective

[CL][Handling non-personalized parameter]

To verify terminal does not set the data listed below to Network if the data is not personalized.

- Device Information (Tag:'9F6E')
- Partner Discretionary Data (Tag:'9F7C')

Test Card

Card_CL_19

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Contactless Floor Limit, and lower than Contactless Transaction Limit (if present)
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
The data listed below must NOT be present. - Device Information (Tag:'9F6E') - Partner Discretionary Data (Tag:'9F7C')	

1.2.11. 310_02

Test Objective

[CL]

Transaction approved offline.

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
-------------------------	--------------------------

Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction approved offline
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.12. 320_04

Test Objective

[CL][CVM][Online PIN]

To verify the Cardholder Verification Method (CVM) below is consistent with ICS.

- Online PIN

Test Card

Card_CL_10a

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	If the CVM is supported according to ICS: - Return ARC=00 If the CVM is NOT supported according to ICS: - N/A

Notes	Enter PIN = "1234"
-------	--------------------

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	If the CVM is supported according to ICS: i) Cardholder Verification Entry Device must be used to enter PIN ii) PIN verification must be performed If the CVM is NOT supported according to ICS: i) Transaction must be declined offline. ii) PIN verification must NOT be performed.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
If the CVM is supported according to ICS: i) The Cardholder Verification Method (CVM) Results shows that the value of the following Byte must be; - B1 = "02" (Online PIN) - B2 = "00" ii) The PIN value must be consistent with its input value to Terminal (= "1234"). [Bit 52] If the CVM is NOT supported according to ICS: - N/A	

1.2.13. 320_06

Test Objective

[CL][CVM][Signature]

To verify the Cardholder Verification Method (CVM) below is consistent with ICS.

- Signature

Test Card

Card_CL_08

Test Procedure

Transaction Type	Purchase or Cash Advance
------------------	--------------------------

Transaction Amount (Amount, Authorised (Numeric))	If Online only or Offline with online capability terminal: - Equal to or greater than Contactless Floor Limit, and lower than Contactless Transaction Limit (if present) If Offline only terminal: - Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	If the CVM is supported according to ICS: - Return ARC=00 If the CVM is NOT supported according to ICS: - N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	If the CVM is supported according to ICS: - Signature line must be printed unless an electric device displays it. If the CVM is NOT supported according to ICS: - N/A
Transaction Result (Behaviour)	If the CVM is supported according to ICS: i) Signature must be required ii) Receipt or an electric device must be used to capture Signature If the CVM is NOT supported according to ICS: i) Transaction must be declined offline ii) Signature must NOT be required
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
If the CVM is supported according to ICS: - The Cardholder Verification Method (CVM) Results shows that the value of the following Byte must be; - B1 = "1E" (Signature) - B2 = "00" If the CVM is NOT supported according to ICS: - N/A	

1.2.14. 320_09

Test Objective

[CL][CVM][On-Device CVM]

To verify the Cardholder Verification Method (CVM) below is consistent with ICS.

- On-Device CVM

Test Card

Card_CL_09

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	If Online only or Offline with online capability terminal: - Equal to or greater than Contactless Floor Limit, and lower than Contactless Transaction Limit (if present) If Offline only terminal: - Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	If the CVM is supported according to ICS: - Return ARC=00 If the CVM is NOT supported according to ICS: - N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if <i>NOT</i> Transit Reader)	N/A
Transaction Result (Behaviour)	If the CVM is supported according to ICS: - Transaction must be approved If the CVM is NOT supported according to ICS: - Transaction must be declined offline.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if <i>NOT</i> Transit Reader)	

If the CVM is supported according to ICS:

- The Cardholder Verification Method (CVM) Results must be "01 00 02".

B1 = "01"

B3 = "02" (successful)

If the CVM is NOT supported according to ICS:

- N/A

1.2.15. 330_04a

Test Objective

[CL][ODA][CDA][CAPK Index=13]

- 1) To verify the Offline Data Authentication (ODA) below is consistent with ICS.
 - Combined Dynamic Data Authentication (CDA)
- 2) To verify Certification Authority Public Key (CAPK) is correctly stored in terminal if Terminal supports ODA below.
 - Combined Dynamic Data Authentication (CDA)

Test Card

Card_CL_21

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	If Online only or Offline with online capability terminal: - Equal to or greater than Contactless Floor Limit, and lower than Contactless Transaction Limit (if present) If Offline only terminal: - Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if <i>NOT</i> Transit Reader)	N/A

Transaction Result (Behaviour)	If the ODA is supported according to ICS: - Transaction must be approved If the ODA is NOT supported according to ICS: - N/A
Card/Terminal Log Validation	
If the ODA is supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B1b8 = 0 B1b7 = 0 B1b6 = 0 B1b4 = 0 B1b3 = 0 B1b2 = 0 If the ODA is NOT supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B1b8 = 1	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
If the ODA is supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B1b8 = 0 B1b7 = 0 B1b6 = 0 B1b4 = 0 B1b3 = 0 B1b2 = 0 If the ODA is NOT supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B1b8 = 1	

1.2.16. 330_04b ✖CA Public Key Index 11 is sunset at December 31, 2024. After January 2025, 330_04b does not need to be tested.

Test Objective

[CL][ODA][CDA][CAPK Index=11]

- 1) To verify the Offline Data Authentication (ODA) below is consistent with ICS.
- Combined Dynamic Data Authentication (CDA)
- 2) To verify Certification Authority Public Key (CAPK) is correctly stored in terminal if Terminal supports ODA below.
- Combined Dynamic Data Authentication (CDA)

Test Card

Card_CL_13

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	If Online only or Offline with online capability terminal: - Equal to or greater than Contactless Floor Limit, and lower than Contactless Transaction Limit (if present) If Offline only terminal: - Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	If the ODA is supported according to ICS: - Transaction must be approved If the ODA is NOT supported according to ICS: - N/A
Card/Terminal Log Validation	
If the ODA is supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; - B1b8 = 0 - B1b7 = 0 - B1b6 = 0 - B1b4 = 0 - B1b3 = 0 - B1b2 = 0 If the ODA is NOT supported according to ICS: - The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; - B1b8 = 1	

Host Log Validation

(if **Online only** or **Offline with online capability** terminal)

(if **NOT** Transit Reader)

If the ODA is supported according to ICS:

- The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be;

B1b8 = 0

B1b7 = 0

B1b6 = 0

B1b4 = 0

B1b3 = 0

B1b2 = 0

If the ODA is NOT supported according to ICS:

- The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be;

B1b8 = 1

1.2.17. 340_02a

Test Objective

[CL][Contactless Transaction Limit > Minimum Transaction Amount][Exceed]

To verify the data below is consistent with ICS.

- Contactless Transaction Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to Contactless Transaction Limit
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A

Transaction Result (Behaviour)	Contactless transaction must be cancelled. If contact interface is supported according to ICS, terminal must be capable of switching to contact transaction.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.18. 340_02b

Test Objective

[CL][Contactless Transaction Limit > Minimum Transaction Amount]

To verify the data below is consistent with ICS.

- Contactless Transaction Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to Contactless Transaction Limit - 1
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be processed in contactless interface
Card/Terminal Log Validation	
N/A	

Host Log Validation

(if **Online only** or **Offline with online capability** terminal)

(if **NOT** Transit Reader)

N/A

1.2.19. 340_03a
Test Objective

[CL][CVM Required Limit > Minimum Transaction Amount][Exceed]

To verify the data below is consistent with ICS.

- CVM Required Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to CVM Required Limit
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
The Terminal Interchange Profile (TIP) shows that the value of the following Byte Bit must be; B1b8 = 1	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.20. 340_03b

Test Objective

[CL][CVM Required Limit > Minimum Transaction Amount]

To verify the data below is consistent with ICS.

- CVM Required Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to CVM Required Limit - 1
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
The Terminal Interchange Profile (TIP) shows that the value of the following Byte Bit must be; B1b8 = 0	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.21. 340_23a

Test Objective

[CL][CVM Required Limit > Minimum Transaction Amount][Exceed]

To verify the data below is consistent with ICS.

- CVM Required Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to CVM Required Limit
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
The Terminal Interchange Profile (TIP) shows that the value of the following Byte Bit must be; B1b8 = 1	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.22. 340_23b

Test Objective

[CL][CVM Required Limit > Minimum Transaction Amount]

To verify the data below is consistent with ICS.

- CVM Required Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
-------------------------	--------------------------

Transaction Amount (Amount, Authorised (Numeric))	Equal to CVM Required Limit - 1
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
The Terminal Interchange Profile (TIP) shows that the value of the following Byte Bit must be; B1b8 = 0	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.23. 340_24a

Test Objective

[CL][CVM Required Limit > Minimum Transaction Amount][Exceed]

To verify the data below is consistent with ICS.

- CVM Required Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to CVM Required Limit
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
The Terminal Interchange Profile (TIP) shows that the value of the following Byte Bit must be; B1b8 = 1	
Host Log Validation	
(if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.24. 340_24b

Test Objective

[CL][CVM Required Limit > Minimum Transaction Amount]

To verify the data below is consistent with ICS.

- CVM Required Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to CVM Required Limit - 1
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A

Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
The Terminal Interchange Profile (TIP) shows that the value of the following Byte Bit must be; B1b8 = 0	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.25. 340_04a

Test Objective

[CL][Contactless Floor Limit > Minimum Transaction Amount][Exceed]

To verify the data below is consistent with ICS.

- Contactless Floor Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to Contactless Floor Limit
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B4b8 = 1	

Host Log Validation

(if **Online only** or **Offline with online capability** terminal)

(if **NOT** Transit Reader)

N/A

1.2.26. 340_04b
Test Objective

[CL][Contactless Floor Limit > Minimum Transaction Amount]

To verify the data below is consistent with ICS.

- Contactless Floor Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to Contactless Floor Limit - 1
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B4b8 = 0	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.27. 340_13

Test Objective

[CL][Contactless Transaction Limit is not set]

To verify the data below is consistent with ICS.

- Contactless Transaction Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to Maximum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be processed in contactless interface
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.28. 340_14

Test Objective

[CL][CVM Required Limit =< Minimum Transaction Amount]

To verify the data below is consistent with ICS.

- CVM Required Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A

Card/Terminal Log Validation	
The Terminal Interchange Profile (TIP) shows that the value of the following Byte Bit must be; B1b8 = 1	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.29. 340_25

Test Objective

[CL][CVM Required Limit =< Minimum Transaction Amount]

To verify the data below is consistent with ICS.

- CVM Required Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount

Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
The Terminal Interchange Profile (TIP) shows that the value of the following Byte Bit must be; B1b8 = 1	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.30. 340_26

Test Objective

[CL][CVM Required Limit =< Minimum Transaction Amount]

To verify the data below is consistent with ICS.

- CVM Required Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
The Terminal Interchange Profile (TIP) shows that the value of the following Byte Bit must be; B1b8 = 1	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.31. 340_19

Test Objective

[CL][Contactless Floor Limit =< Minimum Transaction Amount]

To verify the data below is consistent with ICS.

- Contactless Floor Limit

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	

The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B4b8 = 1
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)
N/A

1.2.32. 350_02

Test Objective

[CL][MS Mode Support]

To verify the data below is consistent with ICS.

- MS Mode Support

Test Card

Card_CL_05

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	- Transaction must be cancelled or declined
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.33. 350_03

Test Objective

[CL][Legacy Mode Support]

- 1) To verify the data below is consistent with ICS.
 - Legacy Mode Support*

*Legacy Mode must be supported.

- 2) To verify the terminal ignores Tag '91', '71' and '72' and shall not restart the processing with the IC Card for these transactions which Issuer Update is not supported for.

Test Card

Card_CL_06

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00, and Issuer Authentication Data (Tag:'91') and Issuer Script (Tag:'71' and '72')
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	If Online only or Offline with online capability terminal: i) Transaction must be approved ii) Terminal must NOT state following message: "Present Card Again" OR "Processing" *Exact wording of message may differ If Offline only terminal: Transaction must NOT be approved. If Transit Reader: Transaction must NOT be approved.
Card/Terminal Log Validation	
N/A	

Host Log Validation

(if **Online only** or **Offline with online capability** terminal)

(if **NOT** Transit Reader)

N/A

1.2.34. 380_02

Test Objective

[CL][Check Transaction Data in message]

To verify the data listed below is mapped to Network correctly.

[Mandatory]

<Terminal Source>

- Unpredictable Number (Tag:'9F37')
- Terminal Verification Results (TVR) (Tag:'95')
- Transaction Date (Tag:'9A')
- Transaction Type (Tag:'9C')
- Amount, Authorised (Numeric) (Tag:'9F02')
- Transaction Currency Code (Tag:'5F2A')
- Terminal Country Code (Tag:'9F1A')
- Amount, Other (Numeric) (Tag:'9F03')

<Card Source>

- Application Cryptogram (AC) (Tag:'9F26')
- Cryptogram Information Data (CID) (Tag:'9F27')
- Issuer Application Data (IAD) (Tag:'9F10')
- Application Transaction Counter (Tag:'9F36')
- Application Interchange Profile (AIP) (Tag:'82')

[Conditional]

<Terminal Source>

- CVM Results (Tag:'9F34')
- Terminal Type (Tag:'9F35')
- Interface Device Serial Number (Tag:'9F1E')
- Transaction Sequence Counter (Tag:'9F41')

<Card Source>

- Application ID (Tag:'4F')
- Dedicated File (DF) Name (Tag:'84')
- Device Information (Tag:'9F6E')
- Partner Discretionary Data (Tag:'9F7C')

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Contactless Floor Limit, and lower than Contactless Transaction Limit (if present)
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
i) The mandatory data listed below must be present at authorization message. <Terminal Source> - Unpredictable Number (Tag:'9F37') - Terminal Verification Results (TVR) (Tag:'95') - Transaction Date (Tag:'9A') - Transaction Type (Tag:'9C') - Amount, Authorised (Numeric) (Tag:'9F02') - Transaction Currency Code (Tag:'5F2A') - Terminal Country Code (Tag:'9F1A') - Amount, Other (Numeric) (Tag:'9F03') <Card Source> - Application Cryptogram (AC) (Tag:'9F26') - Cryptogram Information Data (CID) (Tag:'9F27') - Issuer Application Data (IAD) (Tag:'9F10') - Application Transaction Counter (Tag:'9F36') - Application Interchange Profile (AIP) (Tag:'82')	

ii) The conditional data listed below must be present at authorization message.

<Terminal Source>

- CVM Results (Tag:'9F34')
- Terminal Type (Tag:'9F35')**
- Interface Device Serial Number (Tag:'9F1E')**
- Transaction Sequence Counter (Tag:'9F41')**

<Card Source>

- ADF Name (Tag:'4F')**
- Dedicated File (DF) Name (Tag:'84')
- Device Information (Tag:'9F6E')*
- Partner Discretionary Data (Tag:'9F7C')*

*This parameter must be present if terminal specification version is 1.4(JCB) / 2.8(C-5) or later

**This parameter must be present if ICS indicates the parameter is set on the Network.

1.2.35. 300_06

Test Objective

[CL][Exception File Check]

To verify the data below is consistent with ICS.

- Exception File Check (Combination Options Byte 1 Bit 5)

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	Set PAN in Exception File as instructed by the Test Tool.

Pass Criteria

User Validation	
Display	N/A
Receipt (if <i>NOT</i> Transit Reader)	N/A

Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B1b5 = 1	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.36. 300_07

Test Objective

[CL][Status Check]

To verify the data below is consistent with ICS.

- Status Check (Combination Options Byte 1 Bit 7)

Test Card

Card_CL_01

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	A single unit of currency
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	Perform Status Check transaction

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	N/A
Card/Terminal Log Validation	
The Terminal Verification Results (TVR) shows that the value of the following Byte Bit must be; B4b8 = 1	

Host Log Validation

(if **Online only** or **Offline with online capability** terminal)
(if **NOT** Transit Reader)

N/A

1.2.37. 300_21

Test Objective

[CL][Removal Timeout]

To verify the data below is consistent with ICS.

- Removal Timeout

Test Card

Card_CL_18

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Contactless Floor Limit, and lower than Contactless Transaction Limit (if present)
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Do NOT respond within the time set as Removal Timeout
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Terminal must state following message: "Card Read OK. Please Remove Card" *Exact wording of message may differ
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	

N/A

1.2.38. 300_22

Test Objective

[CL][Cancellation of Online PIN Entry]

To verify Transaction is declined if Online PIN Entry is cancelled.

Test Card

Card_CL_10a

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	Cancel Online PIN entry

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	i) Terminal must NOT perform other CVM after Online PIN Entry is cancelled. ii) Transaction must be declined
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.39. 300_24a

Test Objective

[CL][Online PIN][4 digit]

To verify terminal handles Online PIN.

Test Card

Card_CL_10a

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN="1234"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transactions must be approved online.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
The PIN value in the transaction log must be consistent with its input value to Terminal. - "1234"	

1.2.40. 300_24b

Test Objective

[CL][Online PIN][5 digit]

To verify terminal handles Online PIN.

Test Card

Card_CL_10b

Test Procedure

Transaction Type	Purchase or Cash Advance
-------------------------	--------------------------

Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN="12345"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transactions must be approved online.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
The PIN value in the transaction log must be consistent with its input value to Terminal. - "12345"	

1.2.41. 300_24c

Test Objective

[CL][Online PIN][6 digit]

To verify terminal handles Online PIN.

Test Card

Card_CL_10c

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN="123456"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transactions must be approved online.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
The PIN value in the transaction log must be consistent with its input value to Terminal. - "123456"	

1.2.42. 300_24d

Test Objective

[CL][Online PIN][7 digit]

To verify terminal handles Online PIN.

Test Card

Card_CL_10d

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN="1234567"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transactions must be approved online.
Card/Terminal Log Validation	

N/A
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)
The PIN value in the transaction log must be consistent with its input value to Terminal. - "1234567"

1.2.43. 300_24e

Test Objective

[CL][Online PIN][8 digit]

To verify terminal handles Online PIN.

Test Card

Card_CL_10e

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN="12345678"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transactions must be approved online.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
The PIN value in the transaction log must be consistent with its input value to Terminal. - "12345678"	

1.2.44. 300_24f

Test Objective

[CL][Online PIN][9 digit]

To verify terminal handles Online PIN.

Test Card

Card_CL_10f

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN="123456789"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transactions must be approved online.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
The PIN value in the transaction log must be consistent with its input value to Terminal. - "123456789"	

1.2.45. 300_24g

Test Objective

[CL][Online PIN][10 digit]

To verify terminal handles Online PIN.

Test Card

Card_CL_10g

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN="1234567890"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transactions must be approved online.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
The PIN value in the transaction log must be consistent with its input value to Terminal. - "1234567890"	

1.2.46. 300_24h

Test Objective

[CL][Online PIN][11 digit]

To verify terminal handles Online PIN.

Test Card

Card_CL_10h

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0

Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN="12345678901"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transactions must be approved online.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
The PIN value in the transaction log must be consistent with its input value to Terminal. - "12345678901"	

1.2.47. 300_24i

Test Objective

[CL][Online PIN][12 digit]

To verify terminal handles Online PIN.

Test Card

Card_CL_10i

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00
Notes	Enter PIN="123456789012"

Pass Criteria

User Validation

Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transactions must be approved online.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
The PIN value in the transaction log must be consistent with its input value to Terminal. - "123456789012"	

1.2.48. 300_26a

Test Objective

[CL][Online PIN][3 digit]

To verify terminal does not accept 3 digit Online PIN

Test Card

Card_CL_10a

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	Enter PIN="123"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction result must be one of the followings; - Transactoin is declined; OR - Terminal does NOT accept 3 digits/13 digits PIN entry
Card/Terminal Log Validation	

N/A
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)
N/A

1.2.49. 300_26b

Test Objective

[CL][Online PIN][13 digit]

To verify terminal does not accept 13 digit Online PIN

Test Card

Card_CL_10a

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Minimum Transaction Amount
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	N/A
Notes	Enter PIN="1234567890123"

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction result must be one of the followings; - Transactoin is declined; OR - Terminal does NOT accept 3 digits/13 digits PIN entry
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.50. 300_28a

Test Objective

[CL][Response Code management][ARC=00]

1) To verify terminal correctly manages ARC.

2) To verify the terminal ignores Tag '91', '71' and '72' and shall not restart the processing with the IC Card for these transactions which Issuer Update is not supported for.

Test Card

Card_CL_01e

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Contactless Floor Limit and lower than Contactless Transaction Limit (if present)
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=00, and Issuer Authentication Data (Tag:'91') and Issuer Script (Tag:'71' and '72')
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	i) Transaction must be approved. ii) Terminal must NOT state following message: "Present Card Again" OR "Processing" *Exact wording of message may differ
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.51. 300_28b

Test Objective

[CL][Response Code management][ARC=01]

To verify terminal correctly manages ARC.

Test Card

Card_CL_01b

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Contactless Floor Limit and lower than Contactless Transaction Limit (if present)
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=01
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must NOT be approved and terminal states a message which guides operator to refer the transaction to Issuer.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.52. 300_28c

Test Objective

[CL][Response Code management][ARC=04]

To verify terminal correctly manages ARC.

Test Card

Card_CL_01c

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Contactless Floor Limit and lower than Contactless Transaction Limit (if present)
Other Amount (Amount, Other (Numeric))	0
Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=04
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be declined and terminal states a message which guides operator to pick up the card.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.2.53. 300_28d

Test Objective

[CL][Response Code management][ARC=05]

To verify terminal correctly manages ARC.

Test Card

Card_CL_01d

Test Procedure

Transaction Type	Purchase or Cash Advance
Transaction Amount (Amount, Authorised (Numeric))	Equal to or greater than Contactless Floor Limit and lower than Contactless Transaction Limit (if present)
Other Amount (Amount, Other (Numeric))	0

Host Simulator (if Online only or Offline with online capability terminal)	Return ARC=05
Notes	N/A

Pass Criteria

User Validation	
Display	N/A
Receipt (if NOT Transit Reader)	N/A
Transaction Result (Behaviour)	Transaction must be declined.
Card/Terminal Log Validation	
N/A	
Host Log Validation (if Online only or Offline with online capability terminal) (if NOT Transit Reader)	
N/A	

1.3. Applicable Conditions

* The definitions of Online/Offline are shown below.

Online only terminal	1) Terminal Type = "x1" or "x4"; 2) Terminal Type = "x2" or "x5", and Terminal/Contactless Floor Limit =< Minimum Transaction Amount; OR 3) Terminal Type = "x2" or "x5", and Target Percentage to be Used for Biased Random Selection = 99
Offline with online capability terminal	Terminal Type = "x2" or "x5", Terminal/Contactless Floor Limit > Minimum Transaction Amount >= 0, AND Target Percentage to be Used for Biased Random Selection < 99 (if Random Transaction Selection is supported)
Offline only terminal	Terminal Type = "x3" or "x6"
